

To whom it may concern:

While we were building our house, we hired Donal Brosnan as an engineer on our project.

We found Donal to be very professional and helpful throughout. When we rang him in relation to any queries he was most helpful and prompt.

We also found that when he was doing the snag list he was very exact and went through the house like a fine tooth comb. He also made sure the builder completed all the changes outlined in the snag list.

We would highly recommend Donal Brosnan to anyone considering a building project or any related activity.
