A Chara,

In March 2010 the Board of Management replaced the central heating boiler and updated the heating system in the school.

Mr Donal Brosnan was the supervising engineer for the project. From application stage to completion he oversaw all works. I found Donal to be professional, conscientious and thorough at all times. He was always available by phone, and called to oversee the work regularly and the project was completed on time and to all our satisfaction. I also found Donal to be very environmentally aware and I would be happy to avail of his services again, either in a private or school capacity.

Mise, le meas ,
Donál Ó Conchúir
